PROFILE

Process Engineer transitioning into data analytics, with nearly six years of experience in ERP implementation, production data quality, Excel costing tools and management reporting. Built costing calculators used by approximately 20 sales colleagues and completed nine independent analytics projects. Combines practical business knowledge with MySQL, Power BI and advanced Excel skills; fluent English at C2 level.

CORE SKILLS

SQL and MySQL Joins, subqueries, CTEs, recursive queries, window functions, data cleaning and reporting views.

Power BI Interactive reports, data modeling, relationships, filters, slicers and drill-through.

Excel Advanced and nested formulas, lookup functions, conditional calculations, PivotTables, PivotCharts and costing calculators.

Data and reporting Exploratory analysis, validation, reconciliation, documentation and Streamsoft Prestiż ERP.

PROFESSIONAL EXPERIENCE

Process Engineer | PRODMAX SP. Z O.O.

Żuromin, Poland | November 2020 - Present

- Build Excel costing calculators used by approximately 20 sales colleagues. Combine material and component prices, production and setup times, machine use, tooling and electricity costs through nested lookup and conditional formulas.
- Standardized routine repricing through shared input tables and trained colleagues to handle quotations. Updated material prices now flow through calculations without repeating production-floor interviews for every product.
- Led the Streamsoft Prestiż ERP rollout for laser services: defined workflows, coordinated custom requirements with vendor support, documented procedures and trained employees to record production, material consumption and machine use.
- Improved data registration in the plastics production department, addressing inconsistencies in production records and calculations within an existing ERP implementation.
- Previously prepared recurring sales and financial summaries for the Managing Director, alongside departmental employee productivity reports, using ERP data and Excel.
- Issue approximately 100-150 production orders daily and serve as a company-wide point of contact for ERP and process questions. Support colleagues with training, troubleshooting and operational continuity.
- Established a new distribution department: assembled the team, coordinated ERP customization, developed procedures, trained employees and supported day-to-day operations during launch.

LANGUAGES

Polish - native | English - C2, professional communication and documentation.

I agree to the processing of personal data provided in this document for realising the recruitment process pursuant to the Personal Data Protection Act of 10 May 2018 (Journal of Laws 2018, item 1000) and in agreement with Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC (General Data Protection Regulation).

SELECTED ANALYTICS PROJECTS

Nine independent projects, completed outside course assignments. Personally handled database setup, imports, cleaning, SQL, analytical views, data models and visualizations. Three selected examples are shown below.

New York City Traffic Collisions

MySQL + Power BI | Live report | SQL code

Explored 74,881 reported collisions from January 1 to August 29, 2020. Standardized vehicle and contributing-factor categories, used spatial queries to recover missing boroughs where coordinates allowed, and built reporting, dimension and bridge views. Created six report pages covering timing, location and collision outcomes.

Spatial SQL webinar presenter. Invited by the owner of KajoDataSpace to present the NYC project and demonstrate how matching collision coordinates to borough boundary multipolygons reduces missing borough values.

Watch webinar (in Polish)

KajoDataSpace Transactions and Customer Activity

MySQL + Power BI | Live report | SQL code

Analyzed 4,227 transactions from 1,057 customers across 2023-2026. Prepared transaction data and customer-history views, distinguished first and subsequent purchases, and supplied activity data for cohort analysis. Built reports connecting subscription revenue, pricing changes, customer growth and retention.

Maven Toys Sales and Inventory

MySQL + Power BI | Live report | SQL code

Explored 829,262 sales records across 50 stores. Combined sales, product, store and inventory data in MySQL, built reporting views and validated key totals. Created Power BI reports comparing sales volume, revenue, profitability, stock levels and inventory value.

Additional projects cover INC. 5000 company rankings, video game sales, UK railway performance and LEGO sales, plus SQL demonstrations using SuperSales and S&P 500 datasets.

EDUCATION

Postgraduate Studies in Occupational Health and Safety
Paweł Włodkowic University College in Płock | 2022-2023

MA in English Philology | Translation specialization
Mazovian University in Płock | 2018-2020

BA in English Philology | Business specialization
State University of Applied Sciences in Płock | 2015-2018

SELECTED CERTIFICATIONS AND COURSES

2026 Data Analytics, Data Science & Machine Learning - Udemy course.

2025 AWS Certified Cloud Practitioner - AWS certification.

2025 Docker Mastery with Kubernetes and Swarm - Udemy course.

2024 Python Developer - Coders Lab.

2024 Scrum Developer Certified - SCRUMstudy.
